

PRESS RELEASE

27th August 2024

barox showcase extended Xprotect usability at the Milestone Xperience Day UK

barox Kommunikation AG, the global manufacturer of professional standard switches, PoE media converters and IP extenders, will be participating in the Milestone Xperience Day UK as a key technology partner.

Taking place between 17-18 September at The Belfry Hotel & Resort Luxury Hotel in Sutton Coldfield, the event is billed as a premier opportunity for networking and knowledge exchange - with attendees personally invited by Milestone.

Following the release of 'Smart-barox', a DMS SNMP plug-in that greatly extends Milestone XProtect® Video Management Software usability, key exhibitor at the Milestone Xperience Day UK, barox, will be highlighting their unrivalled technical expertise in industrial IP networking products - specifically designed to meet the demands of the video/IP CCTV market.

With their enviable track record of supplying into significant high security and critical national infrastructure projects across the globe, barox integration technology affords seamless Milestone range compatibility, allowing installers and operators to manage their security network and connected devices via the XProtect Smart Client.

With Smart-barox, a live graphical overview of devices and network topology makes invaluable network information instantly available, with the diagnostic data showing the status of cameras and switches - to allow the fast pinpointing of any network or device issues.

Offering peace-of-mind to Milestone XProtect® operators, they will always have sight of which cameras or devices are connected and operational, and for easier recognition, camera names can be displayed too, via ONVIF.

Proactively identifying and responding to camera degeneration, or by automatically rebooting frozen cameras, Smart-barox can significantly reduce engineering callouts and support costs. Furthermore, Smart-barox Device Management System will automatically log the fault and flag-up the issues, to further help installers to pinpoint and diagnose specific system component issues.

Other essential Smart-barox user benefits include, cyber security features, such as authentication certificate login, 100Mbits - 1000Mbits Jumbo Frames, to ensure camera frames are not lost.

At the Milestone Xperience Day UK, attendees will be able to experience the seamless integration of barox technology with the Milestone XProtect® Video Management Software for themselves. "We are delighted to support our long-term technical partner, Milestone," says Sarah Moss, barox Sales Manager UK & Eire. "Our involvement with the Milestone Xperience Day UK reinforces the benefits of the two leading brands in the security market working closely together to provide easy advanced integration for consultants, integrators and end-users.

"We're inviting visitors to the event to come and see how the Smart-barox plug-in, when combined with Milestone XProtect®, can optimize system management and performance, whilst dramatically enhancing the way security networks can be supported."
